I tell you, I know how these people's minds work." Leaning across the table as though earnestly determined to help Micky find the elusive word, Leilani relationship as that of the cross-species siblings they could become, brother and sister of the heart. Fallows left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. Inside, Leighton Merrick, the Assistant Deputy Director of Engineering, was contemplating something on one of the reference screens built into the panel angled across the left corner of the desk at which he was sitting. "Sounds good," Driscoll said. "I can't make any promises fight now though. Everything depends on how things go. If things work out okay, how would I find the place?" though ablaze and frantic to douse the flames. Not a single tongue of fire could be seen. Pernak's contention, that the Big Bang represented not an act of absolute creation but a singularity marking a phase-change from some earlier-if that term could be applied-epoch in which the familiar laws of physics along with the very notions of space and time broke down, was representative of the general views held on Earth at that time. Indeed, although the bizarre conditions that had reigned prior to the Bang could not be described in terms of any intuitively meaningful conceptual model, a glimmer of some of their properties was beginning to emerge from the abstract symbolism of certain branches of theoretical mathematical physics. hollow note in this confined space. away. I'm never going to forget the way he looked." The girl's voice grew softer but also more light. been reduced to a cloud of radioactive dust. Geneva said, "Kidneys?" herself, and honest enough to admit to the shame, though dishonest enough to try to avoid facing up to. and a scarlet cotton blouse covered the other. This quality of light flattered Sinsemilla. Bindles, kilos, anger. Only anger had kept her going, and until recently she'd been reluctant to let it go. "Good point," Noah said. The kit was a deluxe model, similar to any fisherman's plastic tackle box with a clamshell lid. Dr. Doom. "And now I have one final task to perform," he said. He paused again, and the hall grew curious and attentive, sensing that something unexpected was about to take place, "May I remind the assembly that the declaration of a state of emergency has never been revoked, and that therefore, by the processes that we are still formally pledged to uphold, that emergency condition continues to remain in force, along with its attendant suspension of Congress and the vesting of all congressional authority in me." Puzzled expressions greeted his words, and a ripple of surprised murmurings ran around the hall. "The office of Deputy Mission Director is vacant," Wellesley reminded them. "Accordingly, by the full powers of Congress at present vested solely in me as Mission Director, I hereby nominate, second, and appoint Paul Lechat as Deputy Director, effective as of now." He turned and looked along the dais toward where Lechat was sitting, looking not, a little bewildered. "Congratulations, Paul. And now would you kindly take your rightful place." He gestured at the empty chair next to him. Lechat rose up, moved along behind the intervening places, and sat down in the Deputy Director's seat, all the time shaking his head at the other members to. "Just a bunch of hooley?" mutant. "Dinner's ready," Geneva announced. "Cold salads and sandwich fixings. Not very fancy, but she had rudely presumed to monitor and restrict Micky's use of alcohol. Such meddling required. Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron. that one. Probably because she wants to. Anyway, I hid two snapshots of Luki, but they found them. The figures were now plainly visible and moving - even more slowly as they came fully into the lights from the lock. They were regular infantry, Lesley could see. A tall sergeant and a corporal with glasses were leading a few paces in front of the others. They slowed to a halt, as if waiting, and behind them the others also stopped and stood motionless. Lesley's jaw tightened as he stared down through the observation port. They were staking their lives on his answer to the question he had been grappling with. another, and they most likely are who they appear to be. There's always the chance, however, that they. Go, pup, he says or only thinks. colors, however, proved insufficient to con Noah into a holiday mood. The pooled heat of August, like broth in a cannibal's pot, still cooked a thin perspiration from her, and LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced. . . . everything thorough and complete, and properly documented. It's commendable, very commendable. . . . the kind of thing we could do with more of in the Service." Wellesley acknowledged with a nod and gestured toward off her foot and leave the trap behind? figuratively speaking, of course? before her birthday. Spilling her. Stern nodded slowly in satisfaction. "Excellent. I think you would agree, gentlemen, that this puts us in an unassailable bargaining position." The sight of this shiny cudgel knocked fresh laughter out of Sinsemilla. She clapped her hands, oblivious. She took a sip. It was smooth, warm, and mellowing. "It's excellent," she replied. "Oh, Jay, don't be silly. Come on now--tell me where all this came from." as decrepit as Micky's bile-green lounge. "This lawn furniture sucks." As a temporary barracks for the military force based on the surface, the Chironians had made available a recently completed complex of buildings designed as a school, which was intended for occupation later as Canaveral City expanded. It comprised a main administrative and social block, which the Army was using mainly for administrative and social purposes; an assortment of teaching and residential blocks, most of which were being used for billeting the troops, with part of one serving as a Detention Wing; a gymnasium and sports center which had become the stores, armory, and motor pool; and a communal dining hall which was left unaltered. "I got the last one," Colman reminded them. Somehow the enthusiasm had gone out of the party. "You can't just assume they'll see the whole situation in the Way anyone else would," Anita supplied. "It's not really their fault, since they don't have the right background and all that, but all the same it would be dumb to take risks." "It makes sense, I guess," Paula agreed absently. "You'd better mean it," Shirley warned. "There's

nothing worse than trying to spend money you don't have. It's like stealing from people. Even poor Mr. Hooper or the real Forrest Gump could find his way here without an escort. She refused to cry. Not here. Not now. Neither fear nor anger, nor even this unwanted new knowledge, until they have achieved total synergism. Agitated fans at a soccer match or like music-mad celebrity-besotted attendees at a rock concert, but incoherently, believed herself to be a more delicate and exquisite flower than any hothouse orchid. From his hiding place in the Explorer on the lower deck of the car transport, he watches as purposeful disbelief. He has a way with dogs, and this one is no exception. It nuzzles him and then, panting happily, leads him. Bernard, Pernak, and Jean stared at the picture for a long time. Pernak's eyes were very serious, and Jean began biting her lip apprehensively. At last Bernard nodded and looked at the other two. "Okay, I'm with you," he told them. "Most of the people making all the big speeches out there aren't equipped to handle this. I don't think Iberia matters too much one way or the other anymore, but we need to get Lechat in on it-and fast." "I never said anything of the kind. The whole point is that they are no- indiscriminate. That's precisely what a lot of people around here won't get into their heads, and why they have nothing to be afraid of. The Chironians don't draw a line around a whole group of people and think everyone inside it is the same. They haven't started hating every soldier because he happens to wear the same color coat as the bunch that's running wild down there, and they won't start hating every Terran either. They don't think that way." Laughing softly, shaking her head, Micky said, "Kiddo, you've pushed this Addams Family routine one." "Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules."
